

Divorce and the Farm

A farmer's land is his place of business but often also his home and his family inheritance. Capital values are high but profit margins are low. Generations of tax planning will see trusts owning strategic assets.

Season the pot with milk quota, Agricultural Holding Act tenancies, development potential, minerals and a few surprising points of partnership law and you have the intimidating complexity of the farm divorce.

Nick Stone and William Barr, partner and consultant with Mills & Reeve LLP have written a book which brings together industry knowledge and experience and a wide range of legal analysis and advice.

Divorce and The Farm will not make farm divorces easy but it is a practical and readable guide to this most difficult of subjects.
